

SHARED USE *for Cuyahoga County Communities*

Shared use – also called “joint use” or “community use” – occurs when government entities, or sometimes private organizations, agree to open or broaden access to their facilities for community use. At ChangeLab Solutions, we believe that shared use is a winning strategy because it maximizes the use of existing resources to benefit the community as a whole. We hope this list of resources will help you bring shared use to your community.

SHARED USE RESOURCES
